

Remarks

Further and favorable reconsideration is respectfully requested in view of the foregoing amendments and following remarks.

Thus, claim 25 has been amended in the manner suggested by the Examiner for overcoming all of the rejections, by (1) clarifying that the wt% of the silane coupling agent is based upon the total weight of deionized water and (2) deleting the term “substantially” so that the heat radiation preventive coating film becomes the outermost layer on the entire surface of the glass.

That is, the Examiner indicates that amendment (1) above will be effective to overcome the rejection of claim 25 under the second paragraph of 35 U.S.C. § 112; that amendment (2) will be effective to overcome the rejection of claim 25 as being anticipated or suggested by Howes et al.; and that amendment (1) will also be effective to overcome the rejection of claim 25 as being unpatentable over Havey et al.

Accordingly, in view of the foregoing amendments and remarks, it is submitted that each of the grounds of rejection set forth by the Examiner has been overcome, and that the application is in condition for allowance. Such allowance is solicited.

Respectfully submitted,

Masami KUJIRAI
